

DEFINITIONS AND FORMULA SHEET | CHAPTERS 1 - 10

GEOMETRY - MEASURE OF THE EARTH

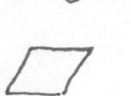

- - point, \emptyset dimension
smallest unit of measure

 line, 1 dim, infinite number of points

 $A, B =$ co-linear

 RAY \overrightarrow{AB} $\frac{1}{2}$ line, endpoint

 LINE SEGMENT \overline{AB} , 2 endpoints

 plane, 2 dim. - made of ∞ # of \longleftrightarrow

 space, 3 dim.

2 lines in same plane are co-planar

equal $=$ exactly the same measurable length

\sim similar, same shape, diff. size
 $\triangle \triangle$

\cong congruent, same shape, same size
Applies to shapes only.

PLANE Geometry
study of 2-dim. shapes

SOLID Geometry
study of 3-dim. shapes
